

## The Educational Aim of the Department

The aim of the Department of Civil and Environmental Engineering is to provide students with a broad-based knowledge of urban planning and environmental engineering. Our department prepares graduates to meet the ever-increasing needs of modern society through its outstanding facilities, and an education program covering several disciplines of civil and environmental engineering. The education program is composed of civil engineering courses on structures, hydraulics, geology, urban planning and architecture., and environmental courses on environmental science, environmental analysis and environmental systems. Students can learn about advanced technologies through computer-assisted education. and are encouraged to pursue their personal engineering interests. Graduates are expected to contribute to local development, and to play an important role in civil and environmental engineering projects internationally and locally.
